## Detailed Features

- Test depreciation option lets you see the effects of either tax or book depreciation methods
- Allows for changes to depreciation methods at any time
- Revalue assets
- Assets can be linked as sub-assets of a master for reporting
- Depreciation calculations done for user defined periods
- Full calculations of disposal and write-off of assets accounting for revaluations
- Ability to reverse depreciation and disposal entries
- Integrated with Pro Series General Ledger and Inventory Control modules
- Track movements in asset locations over time
- Documents and schedules completed and upcoming asset maintenance
- Provides a variety of user selected reports
- Create worksheets for maintenance tasks, describing the nature of the problem, including anticipated time and/or inventory parts required
- Add default costs of parts and labour to maintenance worksheets
- Confirm actual work performed before posting maintenance costs into the General Ledger, and reducing stock on hand for parts
